

How to . . . Make a Magic Cup

Magic cup

- Large plastic bottle
- Craft knife
- Gold paint
- Hot glue gun
- Optional decorations: plastic gems, metallic sharpies

1. Wash and dry the plastic bottle. Screw the lid on firmly.
2. Cut the top off the bottle at the shoulders (just past where the curved part meets the straight body of the bottle). This will form the base of the cup.
3. Cut the bottom off the bottle, leaving tall enough sides to form the bowl of the cup.
4. Using the glue gun, attach the lid to the bottom of the bowl.
5. Paint the cup gold, we used metallic gold spray paint.
6. Add decorations to give the cup some personality!

(I cannot guarantee the cup will have actual magic powers!)
